

Create security ...with Müller Safe

Not just a slogan, but a promise to our international clientele!

Our mission is the protection of persons and facilities. For this purpose we develop and manufacture blast doors in different versions. The commitment to design and technical precision was instrumental for our company's success.

Made in Germany - a guarantee for quality on a high technical level. Our dedicated, experienced team assures an ongoing process of development. In our four facilities in Herborn and surrounding we have been manufacturing high quality products for various security branches for more than 70 years. A state-of-the-art production and continuous investment in our quality management processes guarantee high quality and secure products.

PANZER BLAST PROOF DOORS BT built in highly efficient design by means mixture of high-quality steel and reinforced concrete. The BT 1, 2 and 3 are swing doors with lateral hinges to allow opening from in-and outside. The German Army tested in the laboratories under real conditions and **certified** that, for example the BT 1, resists a shockwave up to 7 bar/101 psi reflected pressure. Simulated calculation by LS-Dyna makes sure that the BT 2 door can withstand **explosion pressure up to 28 bar/406 psi**. The doors can be equipped with an additional escape door which is operated from both sides.

PANZER CUSTOMIZED SOLUTIONS, for example **HANGAR DOORS, HORIZONTAL SLIDING DOORS, VERTICAL SLIDING DOORS**, built in highly efficient design by means mixture of high-quality steel and reinforced concrete. The doors are constructed according to the customers specifications and provide maximum blast protection.

We successfully participated in more than 500 projects worldwide. Let us know your requirements...We will find a solution for your needs!
